The abstract of the disclosure is objected to because it has not been presented in the proper domestic form. Correction is required. See MPEP § 608.01(b).

Claims 1-27, 31 and 32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite in that the variable X represents more than one moiety at the same time (see claim 1).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 1623

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-16 and 30-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Bonnet et al (U.S. Patent No. 5,969,161).

Bonnet et al disclose the claimed antibacterial erythromycin derivative wherein R is hydrogen or methyl, R1 is a dimethylamino group, R2 is hydrogen and R3 and R4 form an oxime group (columns 3 and 4).

Claims 1-16, 29 and 30-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Lundy et al (U.S. Patent No. 6,043,226).

Lundy et al disclose the claimed compounds wherein R is a hydrogen atom or a methyl group, R1 is dimethylamino, R2 is hydrogen, R3 is hydroxyl and R4 is hydrogen. (column 10).

Claims 20 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Ku et al (U.S. Patent No. 5,892,008).

Ku et al disclose the claimed compound wherein R is methyl, R1 is dimethylamino group, R2 is hydrogen and one of R3 and R4 is hydrogen and the other is hydroxy (column 6, compound (6)).

Claims 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bonnet et al (U.S. 5,696,161) or Lundy et al (U.S. Patent No. 6,043,226) in combination with Agouridas et al (U.S. Patent No. 6,096,714).

Each of Bonnet et al and Lundy et al discloses the claimed compounds but does not disclose a process for preparing said compounds by removing cladinose moiety by

Art Unit: 1623

acid hydrolysis. However, since Agouridas et al disclose a process for removing cladinose moiety by acid hydrolysis from an erythromycin derivative (column 4, lines 47-50), a person having ordinary skill in the art at the time the claimed invention was made would have been motivated to prepare compounds disclosed by Bonnet et al or Lundy et al because the results obtained from such a process would have been expected.
